OBJECTIVE

Motivated and detail-oriented professional with a strong foundation in problem-solving, analytical thinking, and modern technology. Eager to contribute technical skills and a research-driven mindset to deliver impactful, innovative solutions in a dynamic team environment.

QUALIFICATION

Course: Master of Engineering. (Pursuing)
College: National Engineering College, Kovilpatti.
Department: Computer Science and Engineering.
Year: 2025-2027
CGPA: 9.00

Course: Bachelor of Engineering.
College: JP College of Engineering, Tenkasi.
Department: Computer Science and Engineering.
Year: 2021-2025
CGPA: 8.73

Course: HSC
School: SRM Govt Girls Hr Sec School, Sengottai.
Group: Maths Computer Science
Year: 2020-2021
Percentage: 86%

PROJECTS

- Predictive Intelligence Model for Plant Leaf Disease Detection:**
 - Developed a deep learning-based plant disease detection system using image processing techniques. Implemented GAN for image generation and foreground extraction. Evaluated ResNet, MobileNet, VGG16, and DenseNet architectures.
 - Achieved 97.42% accuracy using DenseNet. Deployed the solution on NVIDIA Jetson Nano for real-time inference.
- Comparative Analysis of Deep Learning Architectures for Monthly Surface Temperature Prediction:**
 - Compared CNN, RNN, LSTM, and Transformer models for forecasting India's surface temperature using 30 years of ERA5 reanalysis data. Built a unified pipeline with a 12-month sliding window and consistent training protocol for fair comparison.
 - Simple RNN achieved the best results ($R^2 = 0.9486$, 93.94% accuracy), outperforming the other three architectures.

- Sentiment Analysis of Students Reviews for Course Decision making using Deep Learning Approach:**
 - Developed a deep learning model to analyze student feedback and recommend suitable courses.
 - Implemented using Python and Gradio for an interactive user interface.
 - Performed text preprocessing, feature extraction, and sentiment classification.

SKILLS

- Programming Languages:** Java, Python, C
- Web Technologies:** HTML5, CSS3, JavaScript, React
- Frameworks & Tools:** Spring Boot, Git, GitHub, Gradio
- Databases:** MySQL
- AI/ML:** Deep Learning, CNN, GAN, Image Processing, Sentiment Analysis

TRAINING & ACHIEVEMENTS

- Research Paper Presentation:** "Predictive Intelligence Model for Plant Leaf Disease Detection" at the International Conference on Deep Tech and Sustainable Engineering Solution (ICoDSES 2026), National Engineering College.
- NASA International Space Apps Challenge:** Recognized as a "Galactic Problem Solver" for outstanding participation and innovative problem-solving. (2025)
- Campus to Technical Careers Training Program (Capgemini/TNS India Foundation):** Comprehensive training in Full Stack Development, including SQL, Core Java, JPA, Hibernate, Spring Boot, HTML5, CSS3, JavaScript, TypeScript, React, and Git. (2024 – 2025)
- Research Paper Presentation:** "Sentiment Analysis using Deep Learning" at the International Conference on Emerging and Transformative Technologies in Computer Science (ICET-CS). (2025)
- 30 Days MasterClass in Artificial Intelligence:** Successfully completed an intensive program conducted by NoviTech R&D Private Limited. (2024)
- Data Structures in C:** Successfully completed a professional certification course provided by Great Learning Academy. (2023)
